## Skills

---

Web Development, html5, css3, TailwindCSS, Javascript, React.Js, TypeScript, System Analysis, Wordpress

## Projects

---

**See Ghana Tour virtual tour website,** 2020 – 2021

*A project for the Ghana Tourism Development Company* 

I built this prototype website for the Ghana Tourism Development Company (GTDC) during my national service. I built it with html5, Sass & Javascript. I also integrated a virtual tourism application into the website in order to present a proposal to the management of the Ghana Tourism Development Company to create a virtual tour for all tourist sites that they manage.

**Final Year Project (undergraduate), Valley View University** 2020 – 2021

My Final Year Project involved a research work to develop a social protection management information system to register potential members online to make contributions into social security schemes and to provide social assistance to beneficiaries of the scheme via a secure web portal. This thesis was based on a case study into how the social security system works in a developing country such as Ghana.
