Projects

See Ghana Tour virtual tours website, 2020 – 2021

A project for the Ghana Tourism Development Company ⌕

I built this prototype website for the Ghana Tourism Development company(GTDC) during my national service. I built it with html5, Sass & Javascript. I also integrated a virtual tourism application into the website in order to present a proposal to the management of the Ghana Tourism development company to create a virtual tour for all tourist sites that they manage.
