Projects

See Ghana Tour virtual tour website,   2020 – 2021

A project for the Ghana Tourism Development Company ⧉

I built this prototype website for the Ghana Tourism Development Company(GTDC) during my national service. I built it with html5, Sass & Javascript. I also integrated a virtual tourism application into the website in order to present a proposal to the management of the Ghana Tourism Development Company to create a virtual tour for all tourist sites that they manage.

Final Year Project (undergraduate), *Valley View University*   2020 – 2021

My Final Year Project involved a research work to develop a social protection management information system to register potential members online to make contributions into social security schemes and to provide social assistance to beneficiaries of the scheme via a secure web portal. This thesis was based on a case study into how the social security system works in a developing country such as Ghana.
